PROFESSIONAL EXPERIENCE

COMPANY NAME, TORRANCE, CA

Applications Engineer II

9/2022 – Present

- Ensure continuous uptime for critical applications in collaboration with the vice president of IT applications and key stakeholders.
- Display technical skills in troubleshooting and resolving complex technical issues, ensuring seamless system operations.
- Partner with vendors to drive timely, within-scope project completion.
- Promote cross-functional collaboration to address engineering challenges, contributing valuable technical expertise to advance organizational objectives and strengthen product offerings.
- **Steered efforts in optimizing banking applications to enhance both system efficiency and user experience, along with analyzing complex datasets to guide data-driven decision-making.**
- **Led strategic project planning and execution to ensure the successful delivery of high-quality software solutions that meet business goals and exceed client expectations.**

COMPANY NAME, TORRANCE, CA

Senior Software Engineer/Cloud Engineer

3/2017 – 9/2022

- Developed serverless cloud applications using React, Node.js, and AWS services (including ELB, EC2, S3, EFS, AppSync, Route53, and IAM/Identity Center), while designing and deploying resilient cloud infrastructures to optimize NYC transit systems.
- Led the development of single-page applications (SPAs) to improve elevator monitoring across all five boroughs for the Metropolitan Transportation Authority (MTA).
- Directed projects through the entire SDLC, while cultivating a collaborative team environment.
- Championed the adoption of advanced frameworks like Next.js and Svelte, driving innovation.
- **Formulated custom APIs to optimize automation and monitoring for the Staten Island Rail, enhancing operational efficiency and oversight.**
- **Spearheaded the HVAC control system for NYC transit, increasing energy efficiency across the network.**
- **Built the MTA's elevator monitoring system, minimizing maintenance response times and improving asset management.**
- **Engineered real-time monitoring solutions for the Staten Island Rail, enabling precise tracking of trains, work zones, and service interruptions, improving both safety and service reliability.**

COMPANY NAME, TORRANCE, CA

Web Developer

10/2014 – 3/2017

- Created and maintained web assets to boost user engagement and optimize site performance.
- Built and refined HTML, JavaScript, and CSS components, significantly improving load times and functionality.
- Contributed to the digital advertising initiatives focusing on improving brand visibility and reach.
- Identified and resolved website issues to ensure a seamless and high-quality user experience.
- Executed design updates that enhanced the user interface, leading to greater user satisfaction.
- Established responsive, mobile-friendly websites using the latest HTML, JavaScript, and CSS techniques, integrating modern design trends to elevate user experience and site appeal.
