WEB DEVELOPER
PREFERRED INDUSTRY: HEALTHCARE

QUALIFICATIONS PROFILE

Innovative and results-driven professional, offering years of experience in designing, developing, and maintaining secure, user-centric web applications in the healthcare sector. Adept at translating complex medical workflows and regulatory requirements into accessible and compliant digital solutions. Able to collaborate with cross-functional teams, including clinicians, IT professionals, and healthcare executives, to deliver high-quality platforms that improve patient engagement, streamline operations, and support optimal clinical outcomes. Equipped with an in-depth understanding of full-stack development, proficient at operating modern front-end and back-end technologies.

AREAS OF EXPERTISE

Healthcare Web Application Development | Database Development | User-Centered Design
Agile/Scrum Development | Requirements Gathering | Technical Documentation
Quality Assurance | Web Troubleshooting | API Integration

PROFESSIONAL EXPERIENCE

COMPANY NAME | Hawthorne, CA

Front-End Web Developer   **01/2023–Present**

- Design and implement responsive, Health Insurance Portability and Accountability Act (HIPAA)-compliant web applications to enhance patient data security and streamline access for healthcare providers
- Collaborate with cross-functional teams, including medical staff and IT specialists, to develop user-friendly interfaces for electronic health record (EHR) systems
- Optimize website performance and accessibility, ensuring seamless operation across devices for diverse patient demographics
- Integrate third-party APIs for telehealth services, enabling real-time virtual consultations with healthcare professionals
- Develop custom dashboards for monitoring patient outcomes, improving clinical decision-making through real-time data visualization

Key Accomplishments:

- ✓ Spearheaded the redesign of the patient portal, increasing user engagement by 40% and improving appointment scheduling efficiency
- ✓ Reduced page load times by 50% through code optimization and resource management, enhancing user experience for critical healthcare applications
- ✓ Implemented advanced security protocols that passed rigorous compliance audits with zero vulnerabilities detected

COMPANY NAME | Hawthorne, CA

Web Designer Lead   **07/2021–12/2022**

- Engineered interactive web portals that empower patients to securely access medical histories, lab results, and personalized health insights
- Collaborated with clinical teams to translate healthcare compliance requirements into technical specifications, ensuring full regulatory adherence
- Built scalable backend services to support integration with wearable health devices, enabling real-time data syncing and remote patient monitoring

Key Accomplishments:
- ✓ Delivered a custom telehealth platform that facilitated over 10,000 virtual visits within the first six months, improving patient access during the pandemic
- ✓ Streamlined appointment booking workflows, cutting patient wait times by 25% and boosting clinic operational efficiency
- ✓ Recognized for pioneering a mobile-first approach that increased patient portal usage by 50%, enhancing overall patient engagement
