SOLUTION ARCHITECT

*Microservices Architecture and Design | Microservices-Based Solutions Development | Process Improvement
Enterprise Systems Engineering | Software Development Life Cycle | Budget and Schedule Coordination
InnerSource | Agile Methodologies | Solutions Development | Time Management and Prioritization*

QUALIFICATIONS PROFILE

Multifaceted, innovative, and solutions-focused IT professional, offering wide-ranging experience in solution architecture, systems and software development, cloud integrations, and datacenter management in various business and technology domains.

Expert in microservices architecture and frameworks, DevOps, events-driven architecture framework, and middleware platform integration. Adept at implementing critical projects on innovative information technology, communications, and end-user solutions. Armed with outstanding organizational abilities in developing processes, optimizing productivity, and boosting efficiency to achieve organizational goals and objectives. Capable of working with diverse individuals across the organization to ensure superior quality of products, projects, and results.

PROFESSIONAL EXPERIENCE

COMPANY NAME, CITY, STATE

Solution Architect | Senior Engineer

Sep 2016–Present

- Spearhead the development of the following:
 - *Continuous integration/continuous deployment (CI/CD) microservices;*
 - *CI/CD application programming interface (API) proxy gateway;*
 - *CI/CD events-driven architecture framework through Kafka Publisher, Kafka Consumer, and Kafka connect;*
 - *Microservices using Vert.x and EventBus, Spring Boot, Python, and Flask;*
 - *Containerized pipelines for enterprise CI/CD on all tech stacks; and*
 - *Multi-protocol gateway services on DataPower*
- Work with Enterprise Platform teams in conceptualizing and implementing middleware integrations, such as cloud engineering–OpenShift, Google Cloud Platform (GCP), big data container platform, data definition language (DDL) and data manipulation language (DML) databases, IBM DataPower, JBoss, and Kafka
- Employ Spinnaker as the hybrid cloud deployment tool for GCP and open shift platforms as well as lead the migration of enterprise Spinnaker to open-source Spinnaker
- Include tools and services in various monitoring systems, such as Dynatrace, Sysdig, Elastic, and Kibana
- Use several proof-of-concepts in creating effective technical and architectural decisions
- Define program increment (PI) scope and roadmaps with product managers and owners
- Provide direct technical assistance and coaching on coding as well as high-level and accurate technical design

Career Highlights:

- ✓ Earned the following accolades for driving initiatives that delivered impactful results:
 - ABC Award for achieving outstanding milestones for the XYZ project;
 - DEF Award for accomplishing the UVW Project; and
 - GHI Award for demonstrating exceptional performance in diverse projects

COMPANY NAME, CITY, STATE

Architect

Aug 2014–Sep 2016

- Initiated the development and implementation of the following:
 - *CI/CD applications and platforms;*
 - *Integration services on IBM DataPower Middleware ESB to enable integrations;*
 - *Deployment automation platform through CA LISA Release Automation; and*
 - *Development tools central suite of applications*
- Provided efficient solutions and handled all responses on request for proposal (RFP)
- Directed and assisted the Technical Delivery Team, which consisted of team leads, application architects, and software programmers
